Future Prospects

- According to the May 2017 publication of the Common Wealth Magazine, we ranked 163rd place in Service and 6th in Trade. We are not satisfied with the placement and expect to achieve a higher level.
- Regarding the operations and performance of this year, we are still prudently optimistic about the future during the slow global economy growth. As we haven't announced any financial projections, we cannot submit any concrete explanations. In the future, we will continue to be based in Taiwan, operate between Taiwan and China, and expand operations worldwide.

Future Prospects

- This year coincides with the 40th anniversary of the establishment of the company.

Looking toward the future, we will continue steadily with stakeholder to profit mutually, and establish good corporate governance in the pursuit of economic growth and sustainable development.
